

```
const pick = (obj, keys) => Object.fromEntries(  
  keys.map(k => obj.hasOwnProperty(k) && [k, obj[k]]).filter(x => x)  
);
```

```
/*
```

We can also use a Destructuring assignment

```
const { authKey, ...toLog } = userInfo;
```

```
*/
```

```
const pick = (obj, keys) => Object.fromEntries(  
  keys.map(k => obj.hasOwnProperty(k) && [k, obj[k]]).filter(x => x)  
);
```

```
/*
```

We can also use a Destructuring assignment

```
const { authKey, ...toLog } = userInfo;
```

```
*/
```
